

**NEXOPART**

simplicity for your lab

“Our goal at NEXOPART is clearly defined: We want to inspire our customers with precision, simplicity and quality.”

Markus Schönwetter, Technical Director at NEXOPART

---

# We are NEXOPART

---

## The **next** era **of** **particle** analysis.

NEXOPART's aim is to simplify your daily laboratory routine. With our high-performance and easy-to-use products, we speed up your processes and transform your particle analyses into successful and efficient operations.

Whether stones and gravel, granulates, fertilizers, seeds or active pharmaceutical ingredients: Regardless of the type of bulk material the particle size of which you are analyzing – at NEXOPART you will find a suitable solution.

# Two strong partners One new brand

## One partner for you.

NEXOPART is a joint venture of Haver & Boecker oHG in Oelde (Westphalia), Germany and Hosokawa Alpine AG in Augsburg, Germany. These two established premium suppliers are pooling their decades of international experience and expertise in the field of particle analysis in a new dynamic brand. With its expanded portfolio and proven quality, NEXOPART facilitates your day-to-day laboratory work quickly, flexibly and with a clear focus on your needs.

Two highly regarded German companies in the field of laboratory technology and with long-standing ties join to become one:  
**NEXOPART – Your partner for efficient routine laboratory work.**

# A central point of contact

---

## Personal and near you.

Do you have any questions about our products and services?

Do you need an appointment for on-site re-certification of your test sieves or calibration of your test sieving machines?

You would like to train your employees face-to-face or online on how to optimally implement sieve analysis?

Our competent team of consultants and your personal points of contact are always at your service – by phone, email or on site. Internationally, our worldwide NEXOPART sales and service network is at your disposal. You would like to be fully flexible? Order your laboratory supplies conveniently around the clock online through our webshop.

Available everywhere at:

# Our products for you

## Reliable and easy.

NEXOPART offers modern, robust and easy-to-use products for all of your sieve analysis tasks. This in addition to machines for preparing samples and for precise particle size and shape analysis.

No matter which of our sieve analysis instruments you use, maximum accuracy and reliability of analysis results have top priority at NEXOPART. We offer you a powerful and integrated state-of-the-art overall concept and set new standards in precision, performance, and reliability.

# All from a single source

---

## Strong and dependable.

From coarse particles to fine powders – in addition to products for conventional sieve analysis, NEXOPART offers an air jet sieving machine for very fine powders. All manufactured according to highest quality and safety standards. Since all components and materials originate from Germany and Europe we are able to ensure more sustainable and short transport routes and largely secured supply chains. All to the benefit of high product availability and correspondingly short delivery times for you as a NEXOPART business partner.

Maximum quality, long-term reliability and sustainably impressive service – all from a single source:
